

Lonicera dioica

Red Honeysuckle

Also called limber honeysuckle. A small vine or arching shrub, with very fragrant yellow flowers in May and June. Orangish-red berries follow the flowers. Berries provide food for birds. Tolerant of a variety of soils and conditions. Note: this is not one of the exotic invasive honeysuckles (*Lonicera* sp.).

Suggested companions: white oak (*Quercus alba*), hazelnut (*Corylus americana*), gray dogwood (*Cornus racemosa*), prickly gooseberry (*Ribes cynosbati*).
